

Atomic Absorption Spectro AS-5000-240 V

\$18,275.00

Atomic Absorption Spectrophotometer AS-5000

Atomic Absorption Spectrophotometers

Spectrophotometer

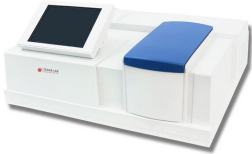

Atomic Absorption Spectrophotometer AS-5000 provides wide range of analytical instrument which includes complete automatic dual beam AAS spectrophotometer. Suitable for analysis of flame absorption, flame emission, graphite furnace atomic absorption and hydride generation analysis method. Function: flame absorption, flame emission, graphite furnace atomic absorption and hydride generation analysis. Designed with 100 mm single peak titanium alloy combustion head, gas pressure with pressure, high accuracy regulator flow regulation, gas, power, anti-tempering function and logic interlock protection device signal system.
