

Biological Microscope TBM-2240

\$15,200.00

Microscopes	Multi-head Biological Microscope	Multi-head Biological Microscope TBM-2200 Series
-------------	----------------------------------	--

Multi-head Biological Microscope TBM-2240 is cost-effective and laboratory-grade performance, choose quintuple nosepiece infinite plan achromatic objective Multi-Head Biological Microscope. The extra wide field 10X is absorbed and delivers a 22 mm field of view which allows you to view more of your specimen. With the features of an infinite optical system, effective high brightness illumination, LED pointer and images coherence for medical teaching and biological teaching, biological analysis, medical and sanitary establishments, laboratories, institutes, colleges, and universities. 24V/ 100W Halogen Lamp Koehler Illumination with consistent color temperature, achromatic objective to ensure high image flatness across the field, and Swing Condenser N.A.0.9/ 0.25. Allow handlers to remain relaxed during long periods of routine microscopy observations. Features with backward quintuple revolving nosepiece holds multiple lenses, and found between the eyepiece and the stage allowing the user to turn it to achieve various levels of magnification. Though the exact level of magnification may vary with different models, most microscopes provide a low power lens with about 5X magnification and a high power lens with about 100X magnification. Featured with Swing Condenser N.A.0.9/ 0.25 with Iris Diaphragm that are concentrates and controls the light that passes through the specimen prior to entering the objective with modern cameras use a type of adjustable diaphragm known as an iris diaphragm which can reduce the amount light that hits a detector by decreasing the aperture and Filter.
