

Cyto Centrifuge CC-1000

\$8,063.00

Blood Bank / Clinical Centrifuge	Centrifuge	Cyto Centrifuge	Cyto Centrifuge CC-1000
----------------------------------	------------	-----------------	-------------------------

Cyto Centrifuge CC-1000 is an independent device especially designed for cytological applications that transfer cells from fluids to glass slides for microscopic examination. It has the capacity for up to 0.5 to 4 ml sample holders. Each specimen holder will accommodate a specimen of up to 12 ml. All the cells from a sample are placed on a glass slide evenly in a specific, square area; therefore, screening of the slide is shortened and easy. It is simple to load and unload chambers.
