Viscometer

Digital
Viscometer
RV-600 Series

Viscometers &
Rheometers

Digital Viscometer RV-610 has major applications in paint, coating, textile, printing, adhesive, and other qualitative analysis involving mucilage, emulsion, polymer, and solvent-based products. The instrument is well crafted with 316 l stainless steel spindles, an in-built temperature probe, wide LCD display, easy switch from dynamic to kinematic viscosity, and vice versa, it is able to calculate viscosity in various units. It has an inbuilt sensor and alarm system for range exceeding parameters, it comes with a durable design with easy linear computerized calibration, advance interference, and easy to clean system.
