

Electronic Micropipette EP3-10

\$740.00

Electronic Micropipette	Liquid Handling Products	Micropipette	Programmable Electronic Micropipette EP3
-------------------------	--------------------------	--------------	--

Programmable Electronic Micropipette EP3-10 multifunctional electronic pipette with four different volume ranges. Allow users to generate programs on the device by letting the pipettes suit multiple application requirements for optimizing laboratory and research work with advanced functions for example provide the actual measurement of sample, dilution, and enable mixing. Ergonomically designed with 2 buttons handle, portable and lightweight with great flexibility. Used to dispense sample measurement with four different volume ranges. These electronic pipettes ease manual work for improving the ergonomics of micropipettes and involve disposable tips that come in contact with the liquid sample.
