Glassware Washers

Laboratory Glassware Washers TGW-4000

Laboratory Glassware Washers TGW-4000 closed and compact sophisticated model and easy to use. The chamber capacity is up to 308 L and perfect solution for both small and large items as it has countertop installation as well as under-counter installation. This model decontaminating equipment worked on moist heat to remove contamination and bacteria with a large wash cabinet and short program cycles. The key features include stainless steel interior, exterior, racks, and inserts withstand heavy use and provide protection against corrosion resistance materials and offer internal components peristaltic pumps and seals laboratory-grade for excellent durability of instruments.
