

Portable Spectrophotometer PS-1105C

\$7,760.00

Portable Spectrophotometer	Portable Spectrophotometer PS-1000 series	Spectrophotometer
----------------------------	---	-------------------

Portable Spectrophotometer PS-1105C is portable spectrophotometer used 45/0 ° geometry of sphere measurement unidirectional illumination systems for SCS optical engine (light splitting and integration system) detects the reflected light at 0°. The instrument complies with all the color measurement standards of CIE, ISO, ASTM, and DIN and achieves the international leading level. Novel and an innovative ring-shaped illumination system used to remove the direction dependence, regardless of changing the sample position. Achieves high accuracy and the repeatability to overcome the influence which the grain brings to the lowest. Comes with a high precise 60°C gloss measuring sensor that enables simultaneous measurement of gloss and color.
