\$2,900.00

Steam  
Autoclave  
TA-200 Series

Steam  
Sterilisers &  
Autoclaves

Tabletop  
Front-loading  
Autoclaves

Tabletop Autoclave TA-223 front loading 'Benchtop' autoclave range is available in four sizes. These units require no plumbing, and only a standard single phase power supply. A 5.7" colour touchscreen with integrated USB data port. Electro polished stainless steel chamber. Simple pre-post vacuum option available with adjustable time and temperature range. Available in size 23 L and is one of the most energy efficient autoclaves available. The pressure vessel design ensures the absolute minimum amount of water is used during a sterilization cycle, which not only means comparably low power consumption, but also very quick heating and cooling. A benchtop autoclave has a variety of uses, being suitable for sterilizing laboratory glassware, plastic receptacles and containers, petri dishes, un-wrapped instruments, media, and occasional discard loads. In addition to laboratory use, it is widely used in scientific research, process manufacturing, veterinary and medical healthcare industries.
