Vertical Laminar Flow Cabinets VL-220 is a work

bench or similar enclosure, which creates a particle-free working environment by taking air through a filtration system and exhausting it across a work surface in a laminar or unidirectional air stream. The laminar flow cabinet is enclosed on the sides and kept under constant positive pressure in order to prevent the infiltration of contaminated room air. Laminar flow cabinet is widely used in medical research laboratories, hospitals, manufacturing facilities and other research and production environments.

Microprocessor control system, LED display

UV Lamp Emission of 253.7 nanometers for most efficient decontamination

Double Sides

Double sides work bench, operators can sit face to fac
